CODE PEAK'21

Code Peak is a month-long programme conducted by Coding Club IIT Guwahati and NWOC IIT Patna that helps students understand the paradigm of Open Source contribution and gives them real-world software development experience. The event targets first-timers who wish to participate in Free and Open Source(FOSS) Contributions and the experienced developers who want to show their skills by contributing to real-world projects.

The programme follows a mentor-mentee format where we select mentors who bring their own projects to which the participants can contribute keeping the spirit of Open Source in mind. The main aim of the entire event is to lay a foundational base and promote the culture of Open Source in India and prepare them for potentially larger Open Source Events at a global level.

FASTEAST GROWING WINTER OF CODE

Previously known as NWOC, the event has reached 320+ universities and colleges and has witnessed the participation of over 3000+ students contributing to 100+ projects, by making over 1800+ Pull Requests.

In the 2021 edition, we aim to take the event to greater heights with the combined efforts of IIT Guwahati and IIT Patna, by reaching an unprecedented number of students with a varied diversity in projects and promoting the spirit of development and Open Source to college students all over the nation.

WHY TO APPLY

You must be having some projects which you started a while ago, but right now you are unable to give it proper time. Or else if you want to explore the open-source community as a mentor. Code Peak '21 can be the perfect opportunity for you to showcase/boost your project and mentor it to exceptional heights.

Being a mentor in Code Peak '21 will provide you with the perfect opportunity to build your management skills as well as provide you with a chance to connect with many programmers from all over the nation.

This experience can give your resume a unique edge as it showcases your passion towards open source and programming in general.

Through Code Peak '21 you get a chance to give back to the programming community of India which we all dearly love!

ELIGIBILITY

CRITERIA

- You must have one or more projects on GitHub with merge access. The project can range from any domain, i.e. web or app, to something more complex like blockchain and machine learning to a full-fledged Operating System itself.
- Your project(s) should have more than five easy-to-fix and at least three moderate level issues.
- Your project(s) should be approved by Code Peak organizers.
- Your Project must satisfy all the conditions mentioned in Project Specifications.

SPECIFICATION

- Your project(s) must have a well-documented README.md with clear instructions for the contributors to set up the project on their local machine.
- The above README must also have an accurate project description with the tech stacks involved mentioned.

REWARDS

- Certificate Of Appreciation by Code Peak'21.
- Mentors will get Code Peak'21 goodies.
- Six Months Voiceflow subscription worth \$240.
- Geeks for Geeks Placement Course.
- Geeks for Geeks coupon worth Rs 300.
- Mentors will exclusively get free access to online courses/competitions offered by Coding Club IITG and NWOC IITP.
- You will be featured in Our monthly magazine - Debugged editions!
- You will also be featured on our social media handles.

CODE OF CONDUCT

- Participate in a supporting way: This would encourage interaction and uplift the spirits of all participants.
- Code Peak does not encourage discrimination on the basis of any gender, caste, colour, religion or nationality. Any such violation shall lead to immediate termination from the programme.
- Keep your codes and messages clean and respectful.
- Incase of any troubles or if you witness any violation of above Code of Conduct, please inform the Organizing Team of Code Peak '21.
- Always bear in mind that we are here just to promote the culture of Open Source and Programming!

EVENT STRUCTURE

TALKS

Specialists from numerous fields present their insights about programming with contributors. Individuals get to recognize many inspiring tales from these specialists. also, members have the opportunity to interact and make clear their doubts on programming from the well-known personalities inside the area of programming.

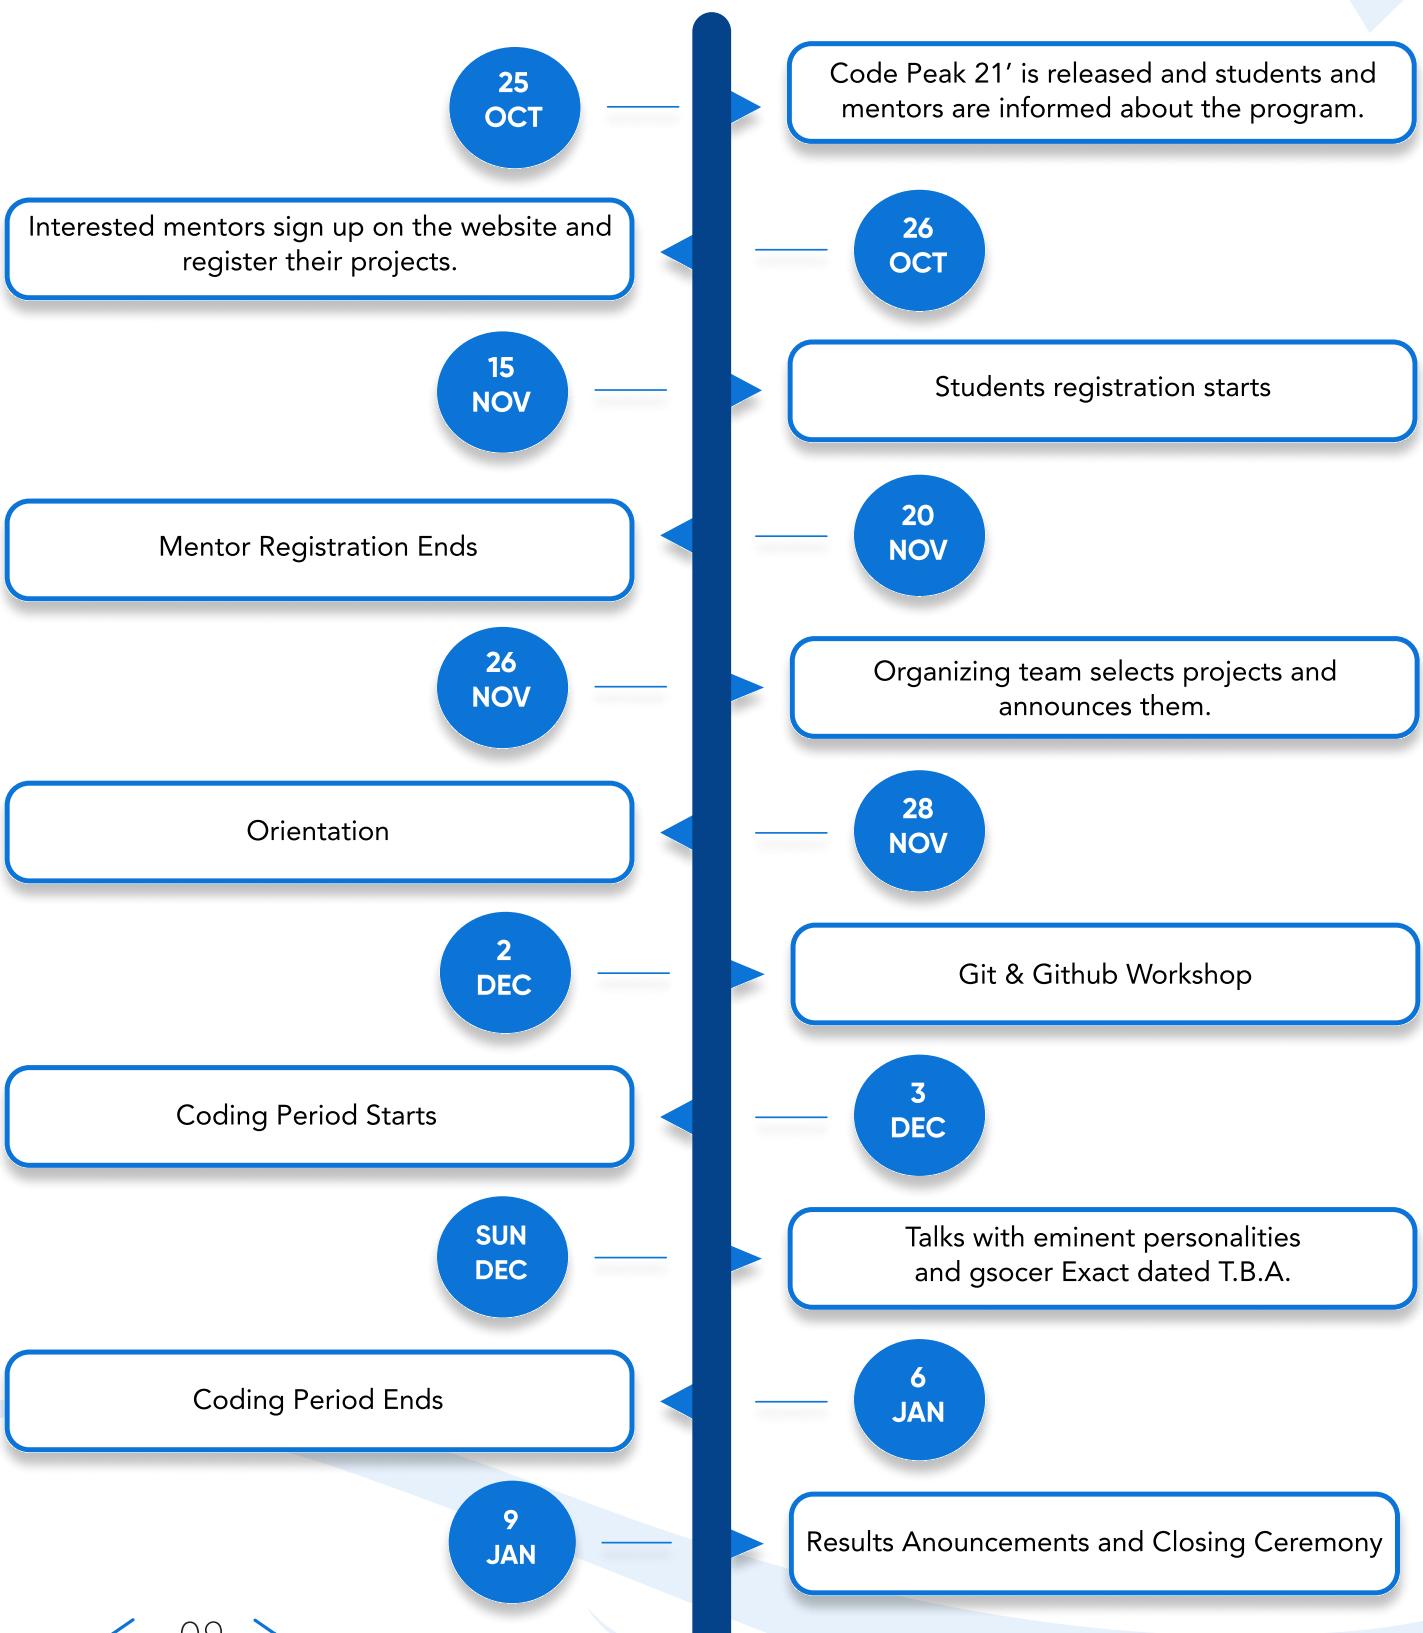

GIT AND GITHUB WORKSHOP

Code Peak brings to you the "Advanced Git and GitHub Workshop" right from basics like installation and pushing-pulling to advanced tools like Branching, also included is a bonus section on the cool perks of GitHub! To give you some hands-on experience, we have tasks designed to get you the feel of how Open Source Events work.

CODING PERIOD

Open Source contribution offers real-world software development experience. The event targets students who wish to participate in Free and Open Source(FOSS) Contributions and experienced developers who want to show their skills by contributing to real-world projects. The program follows a mentor-mentee format where we select mentors who bring their own projects to which the participants can contribute keeping the spirit of Open Source in mind.

TIMELINE

ON YOUR PART!

We look forward to your association to achieve new heights with your encouragement and support.

We hope that you would extend your support to us so that we can better reward our participants with more opportunities as well as awesome goodies for top contributors.

We shall be very grateful if you could also help us with our "Talks" that we have planned by inviting esteemed speakers within your reach to deliver insightful ideas to our curious audience and helping spread knowledge and awareness through your brand's face.

While, of course, none of the above terms is compulsory, we wish to create a bond to exist not only on financial terms, but also something that contributes to a greater good and lays the seed for collaborations in future editions to come.
